Profile

Web Developer undergraduate with hands-on experience in building web applications and internship projects. Skilled in UI/UX, database management, and backend development. Built projects including an Eyes Tracking cheating detection system and a student academic tracking platform. Proficient in Laravel, React.js, JavaScript, and SQL, with a strong focus on creating efficient and user-friendly systems.

Work experience

eyesTrackingSystem

Alrwad high school, Aljubail

January 2026 - February 2026

- Contributed to the development of an Eyes Tracking System during internship training.
- Implemented a gaze/eye movement monitoring feature to track user behavior.
- Developed a cheating detection logic based on eye movement patterns and predefined rules.
- Built and designed the project website with a responsive UI/UX.

student academic tracking platform

Alrwad high school, Aljubail

January 2026 - February 2026

- Designed and implemented the UI/UX of the application to ensure a user-friendly experience.
- Developed database tables and optimized data organization.
- Collaborated with the development team to align the interface with system requirements.
- Improved usability through intuitive layouts and efficient user flows.

Managed company cPanel, email accounts.
